PUMP1050 Transfer Pump

The PUMP1050 is designed to transfer products from a bowl/container to the depositor hopper.

This machine provides the operator with a fast and ergonomic way to transfer product from the mixing bowl at a rate of 60 litres per minute. Speed of operation is dependant on the operators and also the type of product being pumped. An electronic sensor cut off switch is included as standard.

Its heavy duty construction and stainless steel fabrication makes it the ideal choice for busy wholesale operations.

This machine operates using compressed air so no power connections are required. Please note an air compressor is not supplied with the unit.

Specifications

Model:	PUMP1050	
Transfer capacity	60 litres p/min	
Width	720mm	
Depth	1000mm	
Height	A	2500mm
	B	1850mm
	C	714mm
	D	64mm
Weight	50kg	
Air consumption	158L/p min @ 30 deposits p/min
